

PROCEDURE PAYMENT OPTIONS

FLORIDA EYE SPECIALISTS
& CATARACT INSTITUTE

MAJOR CREDIT CARDS ACCEPTED

HSA AND FSA ACCOUNTS

A Health Savings Account (HSA) or Flexible Spending Account (FSA) can be used for deductibles, copays and out of pocket procedures such as LASIK that are not covered by insurance. These accounts are often offered through employers and can make paying for your procedure much more affordable. Funds are distributed into these accounts before taxes from your paycheck and can result in large financial savings. Why not use your tax-free savings on a life-changing procedure?

Care Credit is a convenient option that can let you begin your procedure immediately and then pay for it over the next few months. Put down as much as you feel comfortable and simply finance the rest with 6 months of deferred interest. Care Credit can be used to help pay for many procedures, including LASIK and premium IOL implants for cataract surgery.

If you have already used Care Credit before, we can use your Care Credit Card or access your account with you by calling or going online. If you are new to Care Credit, our surgical schedulers will be happy to walk you through the application.
